What CSE looks like

The Children's Society

Technology and the internet are playing a huge role in the grooming of vulnerable youngsters in Lancashire by predatory sex offenders, according to experts. CATHERINE PYE investigates...

I n the past, it was often the case that a child would be groomed by a predator who would be known to them, perhaps a family friend or a neighbour. But now, the internet has opened up a whole new world of opportunity for predators. They can now find vulnerable children and young people who are at risk of being groomed and exploited. This is a serious problem that needs to be addressed. Experts are warning that the internet is being used to groom children and young people for sexual exploitation.
